Title:

Kleps-Hok Collection on Maria Sibylla Merian

Provenance:

The Kleps-Hok Collection on Maria Sibylla Merian was donated in 1994 by Patricia Kleps-Hok to the National Museum of Women in the Arts. The details of the gift are noted in the correspondence between Kleps-Hok and the Museum and in a preliminary inventory from March 1994. The collection was sorted by medium, and a final inventory was prepared in October 1997.

Collection Dates:

Inclusive Dates: 1650-1993

Physical Description:

2 boxes (approx. 1.8 linear feet)

Summary:

The Kleps-Hok Collection consists of items related to the life and professional work of Maria Sibylla Merian, the first published woman naturalist. Famous for her botanical and entomological subjects, Merian worked primarily in the 17th century. Patricia Kleps-Hok discovered Merian’s work while traveling in Germany in the 1970s and her research makes up the bulk of the collection.

Administrative Information

Access Information:

Unrestricted

Preferred Citation:

Item, Date, Series, Kleps-Hok Collection on Maria Sibylla Merian, Archives of Women Artists, National Museum of Women in the Arts, Betty Boyd Dettre Library & Research Center.

Publication and Photocopies Note:

Permission from the National Museum of Women in the Arts required for publication and reproduction of original materials. Photocopies of original materials can be made for a fee and at the discretion of the library director.

Related Materials Note:

In addition to the holdings listed below, The National Museum of Women in the Arts owns original works by Merian in its permanent collection.

LRC Library Collection

Merian, Maria Sibylla. Artist File. (VF Merian, Maria Sibylla, 1647-1717)

Stuldreher-Nienhuis, J. J. *Verborgen paradijzen; het leven en de werken van Maria Sibylla Merian, 1647-1717.* Arnhem: Van Loghum Slaterus' uitgeversmaatschappij, 1944. (RARE N44 .M5 1944)

Processed by:

Karen Ho, October, 1997

Processing Note:

In 1997, Karen Ho processed the collection. The collection is housed in 32 folders within two archival boxes in the Library and Research Center at the National Museum of Women in the Arts. A final inventory was taken and a finding aid written by Karen Ho in
October 1997. The finding aid was updated to a new format, with additional material added, by Emily Moore in March 2020.

Biographical Note

Patricia Kleps-Hok

Patricia Kleps-Hok was a founder of the Davis Art Center in Davis, CA and on the Board of Directors for the Helene Strybing Arboretum and Botanical Gardens in San Francisco. In addition to her work in the arts, she worked in the publications office of the College of Home Economics at Cornell University. Art and botany are two subjects in which she held a life-long interest, the combination of both led to her love for the works of Maria Sibylla Merian, whom she first discovered in 1973 while visiting Heidelberg, Germany. Fascinated by both the fact that Merian was born in 1647 and she had visited America in 1699, Kleps-Hok began to research the artist. She took German lessons to translate material on Merian as there was very little printed about her in English. The anonymity of Merian convinced Kleps-Hok that the modern world should learn more about her. Kleps-Hok died in 2019 at the age of 102.

Maria Sibylla Merian

Besides creating visual images of great beauty, Maria Sibylla Merian (1647-1717) made observations that revolutionized both botany and zoology. This extraordinary artist-scientist was born in Frankfurt. Her father, Matthäus Merian the Elder, was a Swiss printmaker and publisher who died when she was three. One year later her mother married Jacob Marell, a Flemish flower painter and one of Merian’s first teachers.

From early childhood, Merian was interested in drawing the animals and plants she saw around her. In 1670, five years after her marriage to the painter Johann Andreas Graff, the family moved to Nuremberg, where Merian published her first illustrated books. In preparation for a catalogue of European moths, butterflies, and other insects, Merian collected, raised, and observed the living insects, rather than working from preserved specimens, as was the norm.

In 1685 Merian left Nuremberg and her husband, from whom she was later divorced, to live with her two daughters and her widowed mother in the Dutch province of West Friesland. After her mother’s death, Merian returned to Amsterdam. Eight years later, at the age of 52, Merian took the astonishing step of embarking-with her younger daughter, but no male companion-on a dangerous, three-month trip to the Dutch colony of Surinam, in South America, having received a grant from the City Fathers of Amsterdam. Having seen some of the dried specimens of animals and plants that were popular with European collectors, Merian wanted to study them within their natural habitat. She spent the next two years studying and drawing the indigenous flora and
fauna. Forced home by malaria, Merian published her most significant book in 1705. The lavishly illustrated Metamorphosis of the Insects of Surinam established her international reputation. A second, posthumous, edition was published under the title Dissertatio in Insect Generations and Metamorphosis in Surinam.

She was the first published woman naturalist and became so respected and well known that many eminent collectors, including Peter the Great, bought her work. Merian died on January 13, 1717 possibly from a stroke.

Scope and Content Note

The Kleps-Hok Collection on Maria Sibylla Merian consists of two boxes of material, which includes biographical & bibliographical information, correspondence, notes, and photographs. These items relate to Merian's artistic life and Kleps-Hok's search for information. They are arranged by medium within the boxes.

The biographical files series is the largest, containing fourteen folders of information, dating from c 1650 to 1993. This section not only includes Kleps-Hok’s manuscript entitled, *Search for Sibylla: The 17th Century’s Woman of Today*, but also copies of German text from books (some have English translations) regarding Merian found during Kleps-Hok’s research period.

The correspondence series consists of information dating from 1682 to 1979, including copies of sections of letters by Merian to her daughter, translations from the letters, and also letters regarding Kleps-Hok’s interest in Merian.

The notes series consists of material on Merian and the author's notes on Merian’s books and correspondence. Also, this section includes translations of Merian’s *Caterpillar Book: The Wonderful Metamorphosis and the Special Flower Sustenance of the Caterpillar* and *Neues Blumenbuch*.

There are only two photographs in the photograph series: one is a reproduction of the genealogical tree of Merian and the other is a Merian family portrait. Another series is photocopies of excerpts from Merian’s books *Caterpillar Book: The Wonderful Metamorphosis and the Special Flower Sustenance of the Caterpillar* and *Neues Blumenbuch*.

There is also a lithographs/facsimile series containing facsimiles of Frankfurt, Germany (Merian’s birthplace) and a castle in Heidelberg, German and the lithograph is of Nuremberg, German where Merian lived for a time.

Two miscellaneous items are also included in this collection: a bibliography, consisting of three pages from the Germanisches Nationlmuseum in Nuremberg, and microfilm of part of Merian’s book, *Caterpillar Book: The Wonderful Metamorphosis and the Special*
Flower Sustenance of the Caterpillar- (Photocopies of the same pages can also be found previously in the collection.)

Organization and Arrangement Information

Arrangement Note:

The collection is divided into eight series:

Series I: Biographical Files, c. 1650-1675, 1835-1839, 1909-1993
Series II: Bibliography, n.d.
Series III: Correspondence, 1682-1705, 1975-1979
Series IV: Excerpts, 1679-1680
Series V: Lithograph/Facsimiles, c. 1620 and 1716
Series VI: Microfilm, 1679
Series VII: Notes, n.d.
Series VIII: Photographs, 1945
